### **DETAILED ACTION**

## Claim Objections

Claims 23 and 29 objected to because they depending upon cancelled claims 21 and 27 respectively. Appropriate correction is required.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 35, 42, 46, 56 and 62 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims recite a "C1 power state", which is an industry standard. Since the industry standards are subject to change and/or revision over a period of time, the recitation of the industry standard in a claim, makes the claim vague and indefinite.

#### Claim Rejections - 35 USC § 102

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 30-35 and 41-62 are rejected under 35 U.S.C. 102(b) as being anticipated by Dunstan [US 5,714,870].

Regarding claims 30 and 43, Dunstan discloses an apparatus [column 9, line 27] comprising an operating system [figure 3] to request a chip [column 9, line 30-31] to start a time counter prior to entering a reduced power consumption state [column 9, line 27-29]; and the chip to start the time counter [column 9, line 37-39].

Art Unit: 2833

Regarding claims 31, 32 and 44, Dunstan discloses wherein the operating system further operates to request the chip to halt the time counter [column 9, lines 33-34].

Regarding claim 33, Dunstan discloses wherein the time counter comprises a reduced power consumption state duration [column 9, lines 28-29].

Regarding claims 34 and 47, Dunstan discloses wherein the chip is a personal computer chipset [column 3, lines 6-7].

Regarding claims 35, 42, 46, 56 and 62, Dunstan discloses the claimed invention except for the reduced power consumption state is a C1 power state. The claims recite C1 power state, which is an industry standard. Since the industry standards are subject to change and/or revision over a period of time, the recitation of the industry standard in a claim, makes the claim vague and indefinite. Therefore this limitation is not given patentable weight.

Regarding claim 41, Dunstan discloses an apparatus [column 9, line 27] comprising means for starting a time counter [column 9, lines 37-39]; means for entering a reduced power consumption state [column 9, lines 28-29]; means for halting the time counter prior to an execution of an interrupt routine [column 9, lines 33-34]; and means for exiting the reduced power consumption state [column 9, line 34].

Regarding claim 45, Dunstan discloses an apparatus [column 9, line 27] comprising means [column 9, line 31] for storing a time of entering a reduced power consumption state in a chip [column 9, line 34]; means [column 9, line 31] for storing a time of exiting the reduced power consumption state in a chip prior to an execution of an

Art Unit: 2833

interrupt routine [column 9, line 34]; and means [column 9, lines 37-38] for automatically calculating a reduced power consumption state duration.

Regarding claim 48, Dunstan discloses wherein both means for storing are located in a chipset [column 9, line 31].

Regarding claims 49-55 and 57-61, the method steps are inherent to the apparatus structures as disclosed above.

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Aoyama [US 6,763,471]; Fujita et al. [US 2002/0095494]; Sakabe [US 5,691,948]; Maher et al. [US 6,343,363].

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanh S. Phan whose telephone number is 571-272-2109. The examiner can normally be reached on M-F 9:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula Bradley can be reached on 571-272-2800 ext 33. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
